# Chipta

👤 Lead Developer

📅 September 2014 – June 2024

🎫 Ticketing Service

📍 Amsterdam, The Netherlands

🌐 [chipta.com/](https://chipta.com/)

Joined this innovative ticketing startup as Lead Developer, scaling the platform from concept to processing thousands of tickets per minute during peak events. Successfully led technical development through 10 years of growth, making Chipta a competitive alternative for independent event organizers.

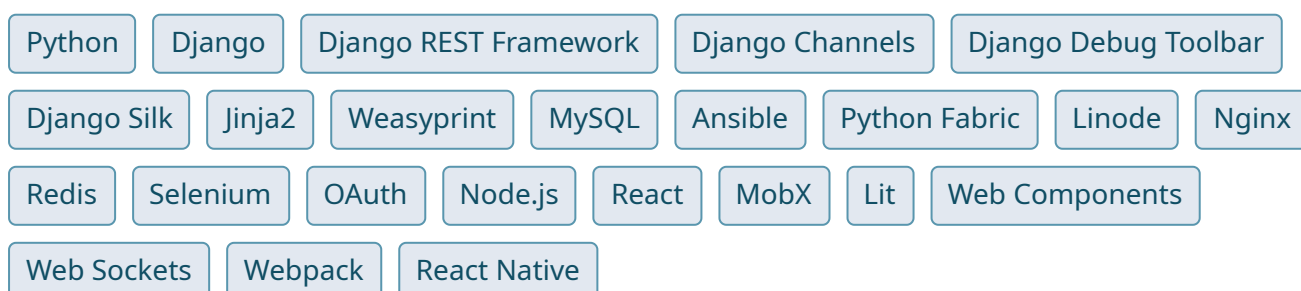

## Key Achievements:

- **Team Leadership:** Built and managed diverse development teams of 3-5 developers, using agile methodologies that optimized efficiency and delivery speed
- **Platform Scalability:** Architected and optimized systems to handle extreme traffic spikes, enabling the platform to process thousands of ticket sales per minute without downtime
- **Performance Optimization:** Delivered 40-60% speed improvements on high-traffic pages through strategic query optimization and caching implementation
- **System Reliability:** Created extensive testing suite (+80% coverage) and CI/CD system, radically improving deployment reliability & speed and enabling regular releases
- **Revenue Growth:** Built essential payment integrations with multiple providers (Mollie, Pay.nl, PayPal) that processed tens of millions in ticket sales over the platform's lifetime
- **Technical Innovation:** Developed custom authentication, mailing, and localization systems, supporting custom needs and backward compatibility
- **Market Expansion:** Created multi-language & country platform capabilities that enabled international market expansion and supported global event organizers

## Technical Impact:

Transformed a proof of concept into a robust, scalable ticketing platform serving thousands of events and processing high-volume traffic reliably.

# Tender-it

👤 Lead Developer

📅 March 2015 – June 2022

🏠 Tender Discovery Platform

📍 Amsterdam, The Netherlands

Built a comprehensive tender discovery platform from scratch, enabling companies to efficiently find and track public procurement opportunities. Delivered a complete solution that automated manual tender search processes for businesses.

***Note:** This was a part-time engagement that I combined with my main focus on Chipta.*

## Key Achievements:

- **Product Development:** Designed and developed entire platform (backend and frontend) from concept to production
- **Search Innovation:** Implemented an extensive search engine using Elasticsearch, making it easy and time effective for users to find suitable tenders
- **Data Automation:** Created automated web crawling system that index thousands of public tenders daily, providing comprehensive market coverage
- **Revenue Model:** Built subscription-based authentication and payment system that supports sustainable business model and user growth
- **User Experience:** Delivered intuitive "saved searches" interface and email notification system that supported user engagement and retention
- **Frontend Optimization:** Successfully collaborated with frontend developer to optimize frontend experience using Vue.js

## Technical Impact:

Transformed a startup idea into a complete, extensible tender platform with a intuitive interface and solid administrative tools.
