Chipta

Lead Developer 📅 September 2014 – June 2024
Ticketing Service 📍 Amsterdam, The Netherlands
chipta.com/

Joined this innovative ticketing startup as Lead Developer, scaling the platform from concept to processing thousands of tickets per minute during peak events. Successfully led technical development through 10 years of growth, making Chipta a competitive alternative for independent event organizers.

Key Achievements:

Team Leadership

Built and managed diverse development teams of 3-5 developers, using agile methodologies that optimized efficiency and delivery speed

Platform Scalability

Architected and optimized systems to handle extreme traffic spikes, delivering 40-60% speed improvements through strategic query optimization, caching, and infrastructure scaling

System Reliability

Created extensive testing suite (+80% coverage) and CI/CD system, radically improving deployment reliability & speed and enabling regular releases

Payment Integration

Implemented and maintained payment service provider integrations with multiple providers (Mollie, Pay.nl, PayPal), ensuring reliable transaction processing for the platform

Technical Innovation

Developed custom authentication, mailing, and localization systems, supporting custom needs and backward compatibility

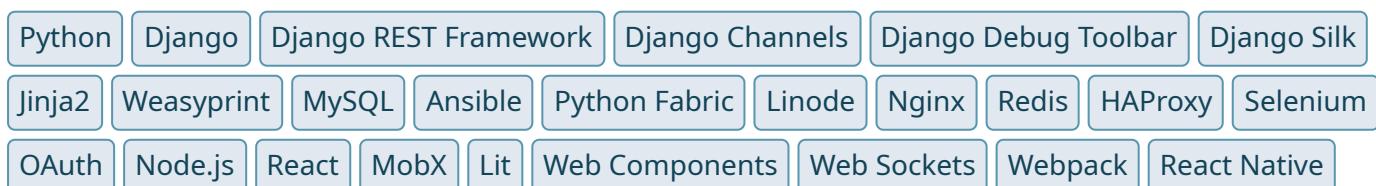

Market Expansion

Created multi-language & country platform capabilities that enabled international market expansion and supported global event organizers

Impact:

Transformed a proof of concept into a robust, scalable ticketing platform serving thousands of events and processing high-volume traffic reliably.

Technologies Used:

Tender-it

Lead Developer

March 2015 – June 2022

Tender Discovery Platform

Amsterdam, The Netherlands

Built a comprehensive tender discovery platform from scratch, enabling companies to efficiently find and track public procurement opportunities. Delivered a complete solution that automated manual tender search processes for businesses.

Note: This was a part-time engagement that I combined with my main focus on Chipta.

Key Achievements:

❖ Product Development

Designed and developed entire platform (backend and frontend) from concept to production

❖ Search Innovation

Implemented an extensive search engine using Elasticsearch, making it easy and time effective for users to find suitable tenders

▣ Data Automation

Created automated web crawling system that index thousands of public tenders daily, providing comprehensive market coverage

§ Revenue Model

Built subscription-based authentication with recurring payments that supports sustainable business model and user growth

₩ User Experience

Delivered intuitive "saved searches" interface and email notification system that supported user engagement and retention

↗ Frontend Optimization

Successfully collaborated with frontend developer to optimize frontend experience using Vue.js

Impact:

Transformed a startup idea into a complete, extensible tender platform with a intuitive interface and solid administrative tools.

Technologies Used:

Python | Django | Django REST Framework | Django Celery | Python Requests | MySQL
Beautifulsoup | Elasticsearch | Linode | Nginx | Node.js | React | Vue.js | Webpack
